DIARY NOTES

DD/S

17 March 1971

25X1A

DCI Security - Mr. Osborn and I chatted with Colonel White concerning the Director and possible improvements in his Security assistance. Mr. Osborn noted that he had raised the question of better control of the Director's automobile and the Director seemed to be responsive at least as far as the proposed new vehicle is concerned. We would hope that he would reverse the present arrangement under which [REDACTED] keeps the Chrysler at his residence. We talked also about escort and surveillance possibilities with Mr. Osborn noting the present practice approved by the Director of sending a Security vehicle ahead of the Director to run planned itineraries especially from his quarters to the building. Mr. Osborn also advised that the Director approved the advice to the SDO by Ops Center of the Director's off-hours location. Mr. Osborn also hopes ultimately to gain agreement to having a Security Officer drive the Director's vehicle or at least ride in the vehicle particularly in times of anticipated difficulty. On 14 April Mr. Osborn talked with the Director who agreed to two things: (a) effective this date the DCI's Chrysler will be garaged at Headquarters overnight and (b) that effective 23 April (presumably through the period of demonstrations) a Security Officer will drive the Chrysler.
